## NN (L) Global Bond Opportunities - X Cap EUR

ISIN: LU0546921882

A sub-fund (hereafter referred to as the fund) of NN (L)

This fund is managed by NN Investment Partners B.V.

### Objectives and Investment Policy

The fund primarily invests in a diversified international portfolio of government- and corporate bonds of high quality (with a rating of AAA to BBB-), denominated in various currencies. Other than directly investing in investment grade government- and corporate bonds, the fund may also invest in corporate bonds with a higher risk and therefore with a higher interest rate (so called high yield bonds, with a quality rating lower than BBB), or bonds issued and/or denominated in the currencies of developing countries ("emerging markets") in Latin America, Asia, Central Europe, Eastern Europe and Africa and/or investments in foreign currencies. The fund uses global active management to anticipate changes of the level of government bond

yields, the yield curve, FX rates and credit spreads based on fundamental- and quantitative analysis. The fund positioning will therefore materially deviate from the benchmark. Measured over a period of several years we aim to beat the performance of the Bloomberg Barclays Global Aggregate benchmark. The benchmark is a broad representation of the investment grade global bond universe. For risk management purposes, bond and country deviation limits are maintained relative to the benchmark. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. Investment in this fund involves an extensive use of derivative instruments which might result in an increase of the importance of losses and gains, which in turn could result in greater fluctuations in the value of the fund.
