

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

NN (L) Patrimonial Balanced European Sustainable - X Cap EUR (hedged ii)

ISIN: LU0121217920

A sub-fund (hereafter referred to as the fund) of NN (L) Patrimonial

This fund is managed by NN Investment Partners B.V.

Objectives and Investment Policy

The Sub-Fund promotes environmental and/or social characteristics, as described in Article 8 of the SFDR (subject to regulatory approval, see pre notice 28-6-2022). The fund mainly invests in a diversified portfolio of Eurozone fixed income instruments, including green bonds, denominated in Euro and European stocks from companies and issuers pursuing policies of sustainable development observing environmental, social and governance principles. To determine our eligible sustainable investment universe, companies are screened using exclusionary screening whereby companies with serious and structural issues concerning controversial behaviour and activities are excluded. We also do not invest in issuers involved in activities including but not limited to, the development, production, maintenance or trade of controversial weapons, the production of tobacco products, thermal coal mining and/or oil sands production. Further, more stringent restrictions are applicable for investments in issuers involved in activities related to gambling, weapons, adult entertainment, fur & specialty leather, Arctic drilling and shale oil & gas. Only countries with the best environmental, social and governance scores are eligible to invest in. The fund uses active management to respond to changing market conditions by using amongst others fundamental and behavioural analysis resulting in dynamic asset allocations over time. The fund positioning can therefore materially deviate from the benchmark. The fund is

actively managed against an investment profile of 50% bonds denominated in Euro and 50% European stocks. Measured over a period of five years we aim to beat the performance of the benchmark composed as follows: 50% MSCI Europe Index (Net), 50% Bloomberg Euro Aggregate. The benchmark is a broad representation of our investment universe. The fund may also include investments into securities that are not part of the benchmark universe. The fund strives to add value via three approaches: (1) Tactical allocation between and within stocks and bonds, (2) Selection based on the analysis of companies and issuers which combine environmental, social (e.g. human rights, non-discrimination, fight against child labor) and governance factors with a financial performance, (3) Decisions aimed at portfolio diversification and risk management. For this specific hedged share class we apply a currency hedging strategy. By hedging our currencies we aim to avoid currency risks for euro investors. We hedge all currency risks in the portfolio of the sub-fund to the reference currency of this share class (EUR). A currency hedge consists of taking an offsetting position in another currency. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

Risk and Reward Profile

Lower risk - Typically lower rewards

Higher risk - Typically Higher rewards

|---|---|---|---|---|---|---|

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is riskfree.

This fund is in category 4 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the markets, associated with financial instruments used to reach the investment objective is considered high.

These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. Hedging share classes, a method to try to manage specific currency risk, may lead to additional credit risk and to residual market risk depending on the effectiveness of the hedging performed.

Charges

All charges paid by the investor are used to pay the running costs of the fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:

| | |
|---------------|----|
| Entry charge | 5% |
| Exit charge | 0% |
| Switching fee | 3% |

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year:

| | |
|----------------|-------|
| Ongoing charge | 2.27% |
|----------------|-------|

Charges taken from the fund under certain specific conditions:

| | |
|-----------------|----|
| Performance fee | 0% |
|-----------------|----|

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

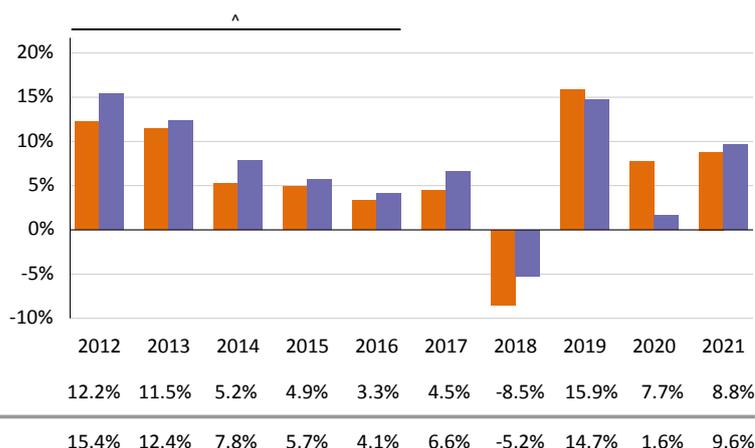

The ongoing charges figure is based on expenses for the year ending 12/2021. This figure may vary from year to year.

It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the funds when buying or selling units in another collective investment undertaking.

You can find more detail about the charges in the chapter "Subscriptions, redemptions and conversions" and "Fees, expenses and taxation" of the prospectus which is available on our website <https://www.nnip.com/library>.

Past Performance

- Performance in the past is not a reliable indicator of future results.
- The past performance shown here takes account of all charges and costs, excluding entry and exit costs and fund switching costs.
- This sub-fund was launched in 1995.
- This share class was launched in 2001.
- The past performance is calculated in EUR.

^ This performance was achieved when the fund had different characteristics.
