Unit Class for Institutional Investors (I) – 3K International Income Bond Fund

ISIN:GRF000316007

The mutual fund is managed by 3K INVESTMENT PARTNERS MUTUAL FUND MANAGEMENT COMPANY SINGLE MEMBER SA.

Objective and Investment Policy

The investment objective of the mutual fund is to achieve the highest possible returns by investing in debt securities traded in Greece or abroad.

- To achieve its objective the mutual fund invests at least 65% of its net assets in debt securities (bonds), whose issuers or guarantors are Member States of the European Union or public international organizations in which one or more member states or companies located in member state of EU participate and that are traded in regulated markets in Greece or abroad. It may also invest secondarily in other transferable securities, money market instruments, fixed income securities, bank deposits, units or shares in Undertakings for Collective Investments in Transferable Securities (UCITS). The mutual fund's investment in equities may not exceed 10% of the fund's net assets. It is noted that the Fund is allowed to invest all its assets (100%) in transferable securities and money market instruments of the same issuer issued or guaranteed by the Greek State or other Member States of the European Union under the specific terms referred in its Regulation.
- The acquisition or redemption of units is possible each (working) day following the shareholder's request, on the corresponding subscription or redemption price, as calculated in accordance with the fund's Regulation and published on the website of 3K Investment Partners (www.3kip.gr).
- The mutual fund's benchmark is the Euribor 12M + 1%. The mutual fund's Benchmark is the Total Return Index/Athens Stock Exchange General Index. The fund implements active management over the benchmark, given that the selection of the fund's holdings in relation to the composition of the benchmark is at the discretion of 3K Investment Partners, in the sense that for the portfolio management, 3K Investment Partners does not follow the composition of the benchmark. The fund's benchmark is used for comparison purposes only.

- Any profits occurred are reinvested.

More information:

- 3K Investment Partners M.F.M.C exercises active management of the mutual fund. The selection of debt securities is based on the analysis and evaluation of parameters, such as the interest rate environment and the issuer's creditworthiness always within the context of optimizing the risk-performance balance.
- Derivatives may also be used, for hedging purposes, which may affect the mutual fund's performance.
- The transaction costs involved to the mutual fund's assets affect its performance.
- The mutual fund is addressed to investors with a long-term investment horizon (more than 3 years), who are willing to have exposure to the fixed income markets.

Recommendation: This fund may not be appropriate for investors who plan to divest their investment within 3 years.

Risk and Performance Profile

- Placed in risk category 4 as it invests predominantly in debt securities, which may fluctuate. Therefore the risk level is medium. Due to a substantial change in the fund's investment policy in 2019, the composite risk and return indicator has been calculated on a representative portfolio basis. The risk category mentioned in this section may deviate from the current one.
- Historical data may not be a reliable indication of the future performance of this fund.
- Classification of the fund based on the above indicator is not guaranteed and may change in the future.
- The lowest category of risk (1) does not mean that the investment is risk-free.

The material risks associated with the mutual fund are the following:

- Market risk (the risk of falling market prices and the consequent decline in the prices of some of the securities in the fund's portfolio) is medium, since the fund invests in transferable securities, which may fluctuate.
- The credit risk, ie the risk of an issuer being unable to discharge its obligations is high, as the mutual fund invests mainly in debt securities.
- The mutual fund's liquidity risk is low. Liquidity Risks arise when a specific underlying investment is difficult to be liquidated, causing possible difficulty to redeem your investment.
