What is this product?

Type

Goldman Sachs Funds III is an undertaking for collective investment organized under the laws of Luxembourg as a société d'investissement à capital variable (S.I.C.A.V.) and qualifies as a UCITS. Goldman Sachs Funds III is registered pursuant to Part I of the Law of 17 December 2010 and is established as an "umbrella structure" comprised of a number of sub-funds. You are purchasing a class of shares in the sub-fund.

Term

The term of the Fund is unlimited and therefore there is no maturity date. The Manufacturer may not unilaterally terminate the Fund, however, the directors of the Fund and/or the investors of the Fund may in certain circumstances set out in the Prospectus and constitutive document of the Fund, unilaterally terminate the Fund. Cases of automatic termination may be foreseen by laws and regulations applicable to the Fund.

Objectives

The Fund is classified as a financial product under Article 8 of the EU Sustainable Finance Disclosure Regulation. The Fund promotes environmental or social characteristics but does not have a sustainable investment objective. The Fund integrates ESG factors and risk in the investment process alongside traditional factors. Detailed information on the sustainability related disclosures of the Fund can be found in the Template Pre-contractual disclosure (annex of the prospectus) on <https://am.gs.com/en-int/advisors/funds>. The fund invests in debt instruments (i.e. notes, bonds, certificates etc) denominated in currencies of economically developed and politically stable countries which are members of the OECD (Organisation for Economic Cooperation and Development). We invest in countries where we are able to assess specific political and economic risks and in countries that have undertaken certain economic reforms. The issuers of the debt instruments are mainly established in low and middle income developing countries (emerging markets). We invest in South and Central American (including the Caribbean), Central and Eastern European, Asian, African and Middle Eastern debt instruments. Measured over a period of several years, we aim to beat the performance of the benchmark JP Morgan EMBI Global Diversified hedged (EUR). The benchmark is a broad representation of the investment universe. We actively manage the fund via country allocation, curve positioning and bond selection. The portfolio is diversified across countries and instruments. The portfolio composition can materially deviate from the benchmark. For this specific hedged share class we apply a currency hedging strategy. The sub-fund's base currency is US dollar (USD). By hedging this share class we aim to exchange the base currency of the sub-fund (USD) with the base currency of this share class euro (EUR). A currency hedge consists of taking an offsetting position in another currency. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings. The return of the Fund depends on the performance of the Fund, which is directly related to the performance of its investments. The risk and reward profile of the Fund described in this key information document assumes that you hold your investments in the Fund for at least the Recommended Holding Period as set out below under the heading "How long should I hold it and can I take money out early". Please see the section "How long should I hold it and can I take money out early"? below for additional details (including restrictions and/or penalties) on the ability to redeem your investment in the Fund.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for the Recommended Holding Period of 7 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

We have classified this Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the Fund's capacity to pay you.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

Other Material Risks relevant to the Fund not included in the summary risk indicator are set out in the Prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What happens if Goldman Sachs Asset Management B.V. is unable to pay out?

You may not face a financial loss due to the default of the Manufacturer.

The assets of the Fund are held in safekeeping by its Depositary, Brown Brothers Harriman (Luxembourg) S.C.A. (the "Depositary"). In the event of the insolvency of the Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations as set out in the agreement with the Depositary).

How long should I hold it and can I take money out early?

Recommended holding period: 7 years.

The Manufacturer considers this to be an appropriate period of time for the Fund to be able to implement its strategy and potentially generate returns. This is not a recommendation to redeem your investment after this time and while longer holding periods allow greater time for the Fund to implement its strategy, the outcome of any holding period with respect to investment returns is not guaranteed.

Redeeming your shares in the Fund before the recommended holding period may be detrimental in terms of your return and may increase the risks associated with your investment, which may lead to the realisation of a loss.

How can I complain?
