What is this product ?

Type

Goldman Sachs Funds III is an undertaking for collective investment organized under the laws of Luxembourg as a société d'investissement à capital variable (S.I.C.A.V.) and qualifies as a UCITS. Goldman Sachs Funds III is registered pursuant to Part I of the Law of 17 December 2010 and is established as an "umbrella structure" comprised of a number of sub-funds. You are purchasing a class of shares in the sub-fund.

Term

The term of the Fund is unlimited and therefore there is no maturity date. The Manufacturer may not unilaterally terminate the Fund, however, the directors of the Fund and/or the investors of the Fund may in certain circumstances set out in the Prospectus and constitutive document of the Fund, unilaterally terminate the Fund. Cases of automatic termination may be foreseen by laws and regulations applicable to the Fund.

Objectives

The Fund is classified as a financial product under Article 8 of the EU Sustainable Finance Disclosure Regulation. The Fund promotes environmental and social characteristics and has a minimum proportion of sustainable investments. Detailed information on the sustainability related disclosures of the Fund can be found in the Pre-Contractual Document (annex of the prospectus) on <https://am.gs.com/en-int/advisors/Funds>. The Fund is actively managed and aims for a risk and return comparable to the risk and return of the MSCI Emerging Markets (NR) (the benchmark). The Fund also integrates ESG criteria aimed at achieving an enhanced sustainability profile compared to that of the benchmark. The Fund promotes environmental and social characteristics by restricting issuers involved in controversial activities and aiming for lower carbon intensity compared to the benchmark. The benchmark represents the Fund's investment universe. While the benchmark represents the Fund's investment universe, it may at times hold investments that are not part of the benchmark as a result of events such as (but not limited to) the periodic rebalancing of the benchmark, a restructuring or other corporate action of an benchmark constituent. Such instances will be rectified at the next scheduled portfolio construction. The Investment Manager determines the Fund's overall portfolio construction in line with its investment strategy on a quarterly basis. The Investment Manager uses an optimisation methodology to construct the portfolio with an aim to achieve a risk and return profile comparable to the risk and return profile of the benchmark. Moreover, due to the application of the ESG considerations (including exclusionary screens), it is likely that there is a difference between the composition of the Fund's portfolio and the composition of the benchmark causing the risk-return profile of the Fund to deviate from the benchmark. You can sell your participation in this Fund on each (working) day on which the value of the units is calculated, which for this Fund occurs daily. The Fund does not aim to provide you with a dividend. It will reinvest all earnings.

The return of the Portfolio depends on the performance of the Portfolio, which is directly related to the performance of its investments. The risk and reward profile of the Portfolio described in this key information document assumes that you hold your investments in the Portfolio for at least the Recommended Holding Period as set out below under the heading "How long should I hold it and can I take money early out".

Please see the section "How long should I hold it and can I take my money out early?" below for additional details (including restrictions and/or penalties) on the ability to redeem your investment in the Fund.

What are the risks and what could I get in return ?

Risk-Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 7 year(s). The actual risk can vary significantly if you cash in at an early stage and you may get back less.

- The summary risk indicator is a guide to the level of the risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- Other Material Risks relevant to the Portfolio not included in the summary risk indicator are set out in the Prospectus.
- If the Fund is not able to pay you what is owed, you could lose your entire investment.
- We have classified this Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you.
- The actual risk can vary significantly if you cash in at an early stage and you may get back less.
- You may not be able to cash in early. You may have to pay significant extra costs to cash in early.
- Be aware of currency risk. You will receive payments in a different currency than the official currency of the Member State where the Fund is marketed to you, so the final return you will get depends on the exchange rate between the two currencies. The risk is not considered in the indicator shown above.

What happens if the Goldman Sachs Asset Management B.V. is unable to pay out ?

You may not face a financial loss due to the default of the Manufacturer. The assets of the Fund are held in safekeeping by its depositary, Brown Brothers Harriman (Luxembourg) S.C.A. (the "Depositary"). In the event of the insolvency of the Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations as set out in the agreement with the Depositary). Losses are not covered by an investor's compensation or guaranteed scheme.

How long should I hold it and can I take the money out early ?

Recommended holding period: 7 year(s).

The Manufacturer considers this to be an appropriate period of time for the Fund to be able to implement its strategy and potentially generate returns. This is not a recommendation to redeem your investment after this time and while longer holding periods allow greater time for the Fund to implement its strategy, the outcome of any holding period with respect to investment returns is not guaranteed. Investors may redeem their shares on any Business Day (as defined in the Prospectus) by giving prior written notice as further described in the Prospectus. Redeeming your shares in the Fund before the recommended holding period may be detrimental in terms of your return and may increase the risks associated with your investment, which may lead to the realisation of a loss.

How can I complain ?

If you choose to invest in the Fund and subsequently have a complaint about it or the conduct of the Manufacturer or any distributor of the Portfolio, you should in the first instance contact the European Shareholder Services Team at Goldman Sachs Asset Management B.V. via email at ess@gs.com, by post Goldman Sachs Asset Management B.V., Prinses Beatrixlaan 35, 2595 AK, The Hague, The Netherlands or by consulting the following website, <https://am.gs.com/en-int/advisors/contact>
