

## 3K Mutual Fund Anagennisis (AIF)

Cyprus Securities and Exchange Commission Licence No AIF32/2014

**Reference Date 31/01/2026**

### Investment Objective

The fund's investment objective is to achieve capital gains through investing mainly in equity securities of companies listed on Stock Exchanges (organized or other secondary markets). In order to achieve its purpose, the fund invests at least 60% of its assets in equity securities of companies listed on Stock Exchanges (organized or other secondary markets worldwide - note: a significant percentage of the Fund's assets will be invested in equity securities of companies listed in organized or other secondary markets in Europe ). It may also invest in other securities, money market instruments, bank deposits, units or shares of Collective Investment Organizations (UCITS or AIFs) at a global level. Secondly, the fund may hold liquid assets. 3K Investment Partners actively manages the fund. Criteria for the selection of stocks are: the growth perspective, the value of the company, the quality of management, the dividend yield as well as other qualitative and quantitative criteria, while, in addition, emphasis is placed on the sizes of the sectors to which the companies belong, the opportunities and the risks involved. The mutual fund may not invest in derivative financial products nor may it make use of them for hedging purposes. The acquisition or redemption of units is possible every (working) day following the shareholder's request, on the corresponding subscription or redemption price, as calculated in accordance with the fund's Regulation and published on the website of 3K Investment Partners ([www.3kip.gr](http://www.3kip.gr)). The mutual fund's Benchmark is Bloomberg Europe 600 Net Return Index. The fund implements active management over the benchmark, meaning that the selection of the fund's holdings in relation to the composition of the benchmark is at the discretion of 3K Investment Partners and consequently the composition of its portfolio may deviate from the composition of the benchmark. The fund's benchmark is used for comparison purposes and for the calculation of the performance fee. The benchmark and its administrator are no longer registered in the register maintained by ESMA based on Article 36 of Regulation (EU) 2016/1011, but the possibility of using the above benchmark is still possible until 31.12.2025, as derived from Regulation (EU) 2023/2022. Any profits occurred are reinvested.

## 3K Mutual Fund Anagennisis (AIF)

### Lexicon

**Alpha:** Alpha is an extra rate of return - through means of active management - of a fund, over and above the return of the benchmark. In case of a positive alpha, the fund has performed better than the benchmark.

**Annual management fee:** The management fee is an annual cost expressed as a percentage. This fee will not be charged when you buy a fund. It will be withheld annually from the fund's return. It is payment for the fund's management.

**Average Credit Rating:** The average credit rating of the fund is based on the average credit rating of the fund constituents. In order to calculate the composite/average rating at the instrument level, Moody, Fitch and S&P ratings are used. The composite is calculated as an average based on the availability of the credit ratings. This composite rating is calculated for Fixed Income Instruments. The credit quality designations range from high ('AAA' to 'AA') to medium ('A' to 'BBB') to low ('BB', 'B', 'CCC', 'CC' to 'C').

**Beta:** The beta shows how the volatility of a fund is, compared to the wide market.

**Benchmark:** Predetermined, objective measure against which the returns of an investment fund are compared.

**Duration:** Measure for the interest rate sensitivity of bond prices. The longer the remaining average term of the bonds in the fund (higher duration), the more the bond prices will respond to an interest rate change. When interest rates go up, bond prices will go down and vice versa.

**Fund:** 'Fund' is a commonly used term for a collective investment undertaking.

**Fund's Total Net Assets (Mln):** The assets under the management of all share-classes of a fund.

**Information Ratio:** Benchmark for the risk of return when assessing the performance of a fund. The higher the information ratio, the higher the achieved rate of return per unit of risk.

**Net Asset Value (NAV):** The net asset value (NAV) is the price of a sub-fund. The NAV is calculated by adding up the values of all products the fund has invested in and dividing this by the number of outstanding shares.

**Ongoing Charges:** The total annual recurring costs for an investment fund expressed as a percentage. They usually include the management fee, administrative fees, publication costs, etc.

**Performance:** Shows how the value of an investment fund has increased (or decreased) over the specified period. The return takes into account ongoing costs, but no entry fees, exit fees or taxes.

**Rating allocation:** An individual bond's credit quality is determined by private independent rating agencies such as Standard & Poor's, Moody's and BarCap & Fitch. Their credit quality designations range from high ('AAA' to 'AA') to medium ('A' to 'BBB') to low ('BB', 'B', 'CCC', 'CC' to 'C'). Investment grade bonds (ratings 'AAA' to 'BBB') usually have a lower level of risk than bonds with ratings 'BB' to 'C' that are considered as low credit-quality bonds.

**Redemption fee:** This is a one-off fee that may be charged when you want to leave the investment fund.

**Standard Deviation:** The standard deviation tells something about the chance for a rate to fluctuate within a given range in the coming period. In case of a significant standard deviation (= high volatility), we speak about a large range of possible outcomes.

**Subscription fee (max.):** This is a one-off fee for buyers of an investment fund. It is usually expressed as a percentage of the capital you are investing. The provided percentage must not be exceeded in case of a maximum entry cost.

**Summary Risk Indicator:** A standardized risk indicator that takes into account both, the volatility of a financial instrument (market risk) and the creditworthiness of the issuer (credit risk).

**Tracking Error:** The standard deviation of the difference between the monthly returns of a fund and its benchmark.

**Yield to Maturity:** Yield to Maturity is the return on a bond investment if it is held until the end of the term.

**Yield to Worst:** Yield to Worst is the measure of the lowest possible yield that can be received on a (callable) bond that fully operates within the terms of its contract without defaulting.
